REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose, singly or in combination, a nipple as claimed in detail in independent claim 1.

The closest prior art includes: Keegan (US 2,257,385) and Bates et al (US 2,459,123).

Both Keegan and Bates et al fail to teach or fairly suggest a nipple comprising a hollow tube having opposed threaded end portions, wherein a thermally insulating sleeve is disposed about the nipple intermediate the threaded end portions.

Drawings

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In Figures 2 and 4, the inlet (or outlet) conduit, exterior to the casing, should be shown to be threaded to the outer threaded portion of the nipple, and the inner interconnecting conduit, interior of the casing, should be shown to be threaded to the inner threaded portion of the nipple. At present, the inlet (or outlet) conduit and the inner interconnecting conduit are depicted as a single continuous conduit extending through the interior of the nipple and not threaded to the nipple. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Art Unit: 3679

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
